» What next	Develop projects and invest in operating assets	Invest in operating assets and develop projects	Build on this platform to create a large scale controls business	» What next

## Highlights

"2005 was a transformational year for Tersus Energy. We have progressively broadened our emphasis from advisory work to include investing, operating and project development and have established the foundations of three operating businesses, focused on what we believe are the most attractive and significant areas of the renewable and alternative energy sector.

High fossil fuel prices and concerns about energy security and climate change have given accelerating momentum to the renewable and alternative energy markets and, via our three businesses, we intend to participate fully in their growth and future profitability, and in doing so create significant value for shareholders."

**John Devaney**  
Chairman of Tersus Energy Plc

### Group

- » Admitted to AIM in February 2005 raising £3million; an additional £4million raised in December 2005
- » £4.5million invested in eight acquisitions/investments
